8' Tall Wilderness

"[We] saw Secure-All at the home improvement show. It wasn't the cheapest, but certainly was the best built door on the entire show floor (I think there were at least 6-10 vendors). The quality of the door and the customer service is well worth the expense. I would use them again without hesitation."

*- Tim B.
Parker, CO*

8' Tall Wellshire with Active Storm Sidelites

"You get what you pay for and nothing is more valuable than my family's safety and peace of mind."

*-Kim M.
Denver, CO*

Live safe with Crimsafe

Security and storm screens

Doors / Windows / Safe-S-Cape / Patio & Lanai / Commercial

**Living
Safer**

What is Crimsafe?

Crimsafe revolutionized home security in Australia with their innovative high-tensile stainless steel screen technology. More than 20 years later, their products are sold through distributors internationally. The Crimsafe line of products both secure and protect your home or commercial building from intruders and extreme weather, while beautifying and enhancing its appearance.

Every Crimsafe window screen, door, and patio enclosure panel is architecturally designed to fit seamlessly and beautifully into place. The unique patented Screw-Clamp™ technology, combined with 304 grade high-tensile stainless steel mesh screen, create unsurpassed safety and security. All products are installed with proprietary, tamper resistant screws which are then concealed for improved curb appeal.

At impact, the hooking feature of the patented Screw-Clamp™ levers into the aluminum frame and distributes the load around the perimeter of the product, rather than allowing the force to be concentrated at the point of impact. The mechanical fastening of the clamp to the high-tensile woven stainless steel mesh greatly reduces the tendency for the mesh to be pulled out of the frame. These features enable Crimsafe to withstand enormous force.

Secure

Secure on the outside means you are safe on the inside.

Crimsafe products act as a physical barrier to outside elements, securing your home from unwanted intruders, forces of nature and pests.

- 24/7 security from intruders.
- Security from damaging forces of Mother Nature, such as hurricanes, hail, flying debris and excessive heat.
- External barrier from unwanted pests like mosquitoes, scorpions, and wildlife.

Protect

Protect your loved ones and assets on the inside.

Unlike electronic security systems with an on/off switch, Crimsafe permanently provides 24/7 security, protecting what is important to you on the inside of your home. In an emergency situation, Crimsafe provides a safe keyless means of escape that is easily operated in a panic situation; while still maintaining its integrity from the outside.

- Permanent protection for your loved ones and valuables.
- Patented Safe-S-Cape provide worry free protection.

Enhance

Beautiful and energy efficient.

Crimsafe enhances any home with its architectural design and integration. All Crimsafe products come in a variety of colors to match any application. Once installed, Crimsafe screens will virtually disappear, allowing an unobstructed view while enhancing curb appeal.

- Peace of mind – Crimsafe allows you to leave your windows open 24/7 while remaining safe and secure.
- Hidden fasteners allow for no visible attach points and seamless integration.

All Crimsafe products feature

- Patented Screw-Clamp™ fastening system
- Proprietary tamper resistant screws
- Custom built to fit any opening
- Ventilates without compromising safety
- 53% solar heat gain reduction
- Concealed fasteners
- Enhanced aesthetics
- Uncompromised visibility and clear views
- Meets American and Australian Standards
- Multiple frame colors available
- 10 year warranty
- Specialty shapes, including trapezoids and arches
- Fire attenuating features
- Hurricane code approved to Miami Dade, FBC, HVHZ, TDI
- Knife shear tested
- Energy savings

Doors

- 3 point locking system on hinged and sliding patio doors
- Tamper resistant hinges
- Attractive midrails available
- Caretaker feature – allows the hinged door to be locked from the outside

Windows

- Slimline design with concealed fastenings
- Custom built to fit any opening
- Clear views from inside and out

Patio

- Designed to fit existing structures
- Tamper resistant
- 53% solar heat gain reduction

Safe-S-Cape

- Keyless emergency egress and quick release
- Full integrated hinge
- Patented full length tamper resistant lock
- Easy access to window for cleaning
- Custom built to fit any opening

Commercial

- High-risk security applications
- Five times as many screws
- Double clamping
- Larger, thicker profiles
